John Ronald Reuel Tolkien

John Ronald Reuel Tolkien, 3 January 1892 – 2 September 1973) was an English writer, poet, philologist, and university professor who is best known as the author of the classic high-fantasy works *The Hobbit*, *The Lord of the Rings*, and *The Silmarillion*.

He served as the Rawlinson and Bosworth Professor of Anglo-Saxon and Fellow of Pembroke College, Oxford, from 1925 to 1945 and Merton Professor of English Language and Literature and Fellow of Merton College, Oxford, from 1945 to 1959. He was at one time a close friend of C. S. Lewis—they were both members of the informal literary discussion group known as the Inklings. Tolkien was appointed a Commander of the Order of the British Empire by Queen Elizabeth II on 28 March 1972.

After Tolkien's death, his son Christopher published a series of works based on his father's extensive notes and unpublished manuscripts, including *The Silmarillion*. These, together with *The Hobbit* and *The Lord of the Rings*, form a connected body of tales, poems, fictional histories, invented languages, and literary essays about a fantasy world called Arda and Middle-earth within it. Between 1951 and 1955, Tolkien applied the term *legendarium* to the larger part of these writings.

While many other authors had published works of fantasy before Tolkien, the great success of *The Hobbit* and *The Lord of the Rings* led directly to a popular resurgence of the genre. This has caused Tolkien to be popularly identified as the "father" of modern fantasy literature—or, more precisely, of high fantasy. In 2008, *The Times* ranked him sixth on a list of "The 50 greatest British writers since 1945". *Forbes* ranked him the 5th top-earning "dead celebrity" in 2009.

Stephen Hawking Stephen William Hawking, CH CBE FRS (8 January 1942 – 14 March 2018) was an English theoretical physicist and mathematician. Hawking went to **St Albans School**, a local public school in Hertfordshire. At 17, he passed an exam to study at **Oxford**. He studied **physics** and **chemistry** there. Because he found it really easy at the beginning, he didn't study a lot for the final exams.

In October 1962 he started his graduate course at Trinity Hall. It

was at this time that his illness motor neurone disease started to show up. He had difficulties in rowing and then even simply in walking. The illness worsened over the years and he was almost completely paralysed. He used a wheelchair to move, and an Intel computer and a speech synthesiser to help him communicate. However, he finished his PhD and wrote about black holes in his thesis. He then got a fellowship (a job as a university teacher) at Gonville and Caius College in 1965.

Hawking was a **cosmologist**—someone who studies the structure of the universe (stars and space). He invented important theories about the Big Bang (the start of the universe), black holes and how they work. Stephen Hawking predicted that black holes eject some radiation (energy), even though they normally swallow everything. That kind of radiation is named "Hawking Radiation."

Hawking also worked on the problem of quantum gravity. Quantum gravity tries to explain how gravity works with quantum mechanics (physics of tiny things.) That is a hard problem that scientists have not solved yet. Hawking also wrote popular books about science for non-scientists. His first book, *A Brief History of Time*, sold over ten million copies.

Hawking died on 14 March 2018 in Cambridge, Cambridgeshire at the age of 76.

MY VISION FOR INDIA- DR.APJ ABDUL KALAM

Compiled By NEHA PARTHIBAN IX A

My Vision for India' is a speech delivered by India's former President, Dr. A.P.J Abdul Kalam, in which he describes his three visions for India if it has to enter the comity of developed nations. He tries to make people realise their duties and motivate them to build a stronger India.

First vision: He recalls how India has, time and again, been looted by invaders. India, on the other hand, has never invaded any country because it respects the freedom of others. Modern India's First War of Independence was fought in 1857. Having subsequently achieved independence, we need to protect this freedom, without which no one will respect us.

Second vision: India is growing economically and the rate of poverty is declining. The 10% GDP growth rate is a healthy sign. But Dr. Kalam observed that Indians have failed to see themselves as a group of self-reliant people. He, however, wants to see India as a developed and not just a developing nation.

Third vision: To see India strong, both economically and militarily, because people tend to respect those who are strong.

Finally, India could become as great a nation as the United States of America or any European country if its people stop criticising their own government and other institutions. A change in attitude is required. Instead of complaining, people should participate in the process of development by resolving problems on their own.

Dear madam,

I am mother of K R Jasanth & K R Jasnie. I want to extend my sincere thanks to you and your entire staff members for making the field trip that you had organised for our children such a great success. My children remembered everything, they learnt a lot and came home with great memories that will last a lifetime.

They were very enthusiastic and had answers to everyone of our questions.

I really appreciate the effort that you put in to make this educational field trip a funfilled, stress free, educational and safe experience for the parent and the children.

THANKS A LOT

OVER THE BLUE SKY _ A POEM BY G HARSHITHA VIII A

I look at the cyan sky through several bars
Why can't I fly away, why can't I reach that far?

I thought there was a way to fly over the sea,
So I fought For eternity

I wanted you to stay away from war
So you don't suffer the same as I did so far

They were the monsters that we didn't expect,
But why do you think they deserve our respect?

We were best friends all the way
But because of war we have to face the other way

We wanted you to lead but you Couldn't choose
Because of that A new problem rose rose.

I finally flew over the sea
But what's the point when the villain was me
